

**AUTOMATED REPORTING
WITHOUT ADDING
COMPLEXITY**

THE EASIEST WAY TO AUTOMATE REPORTING

Manual spreadsheets waste time, delay audits, and hide exceptions. RS Automation converts your logic into automated reports – clean, fast, and secure.

1

**NO INSTALLATION
REQUIRED**

2

**ZERO DATA LEAVES
YOUR NETWORK**

3

**BUILT FOR AUDIT-
READY ACCURACY**

BUILT ON WHAT YOU DO

We study your current reports and logic, then automate them – no retraining.

SECURE BY DESIGN

You choose how we work: redacted Excel file, remote session, or install in-network.

AUDIT-READY OUTPUT

We generate clean, repeatable reports designed to pass scrutiny every time.

**AUTOMATED REPORTING
WITHOUT ADDING
COMPLEXITY**

HOW IT WORKS

Step 1. We review your current reporting flow (Excel, SQL, or Access) and document the key logic and outputs you rely on.

Step 2. We convert your rules into repeatable scripts using Python, VBA, or SQL, matching outputs 1-for-1 and flagging exceptions automatically.

Step 3. We send you scripts, run in your environment, or work via remote session — whichever meets your compliance needs.

WHY TEAMS TRUST US

- Built by former risk analysts
- Focused on compliance, not just code
- You control every step — we're here to remove effort, not add risk

Ready to Eliminate Manual Reporting?

- ✓ Schedule a strategy call
- ✓ Walk through your current report
- ✓ See a working automation approach
